

李晓军-零基础学缠论

理论

- 一致性原则下, 通过自同构性, 走势生长的概念, 形成动态的自适应 (Under the principle of consistency, through self-isomorphism, the concept of trend growth forms dynamic self-adaptation).
- 以市场的走势为根本, 不作倾向性预判 (Take the market's trend as the foundation, no directional prediction).
- 不测而测 (Measure without measuring).

K线

- 结论K线只有两个价位: 最高价和最低价 (Conclusion: K-line only has two prices: highest and lowest).
- 结论最小分析单位是笔而不是K线, K线只作为笔的组件 (Conclusion: the smallest analysis unit is the stroke, not the K-line, K-line is only a component of the stroke).
- 分型 - 根据相邻的三根K线的形态特征, 归类为四种形态 (Type - according to the morphological characteristics of three adjacent K-lines, classified into four types).

笔

- 笔的组成 - 一笔(顶)分型 + n(n>1)根K线 + 底(底)分型 (Stroke composition - one stroke (top) type + n(n>1) K-lines + bottom (bottom) type).
- 笔的确认 - 新一笔的生成才能确立前一笔的完成 (Stroke confirmation - the generation of a new stroke can confirm the completion of the previous stroke).
- 笔的延续 - 新一笔未生成前, 前一笔为延续状态 (Stroke continuation - before a new stroke is generated, the previous stroke is in a continuation state).

包含关系

- 包含关系 - 确定处理方向 (Inclusion relationship - determine the direction of processing).
- 包含关系 - 确定处理方向 (Inclusion relationship - determine the direction of processing).

笔

- 笔的规则 (Stroke rules).
- 笔中必须出现上涨或下跌序列 (There must be an upward or downward sequence in the stroke).

所谈

- 某级别趋势背驰时形成反趋势还是在原趋势的最后一个中枢进行扩展, 是由第三类买点确立的 (When a trend diverges at a certain level, whether it forms an opposite trend or extends in the last center of the original trend, is determined by the third-class buy point).
- 主力可以改变走势, 却不能改变结果 (Main force can change the trend, but cannot change the result).
