启用插件

The screenshot shows the Chrome Extensions page for the 'Allow CORS' extension. The extension's icon is currently grey, indicating it is disabled. A red arrow points to this icon, with a text box containing the instruction: '3. 点击此灰色图标 彩色即为启用状态' (3. Click this grey icon, colored means enabled state). The extension's details are visible, including its name 'Allow CORS: Access-Control-Allow-Headers', description 'Easily add (Access-Control-Allow-Headers) to the response header.', ID 'lhobafahddgcelffkeicbaginigeeljif', and buttons for '详细信息' (Details) and '移除' (Remove). The extension is currently turned off, as indicated by the grey toggle switch.
